NEW TANDY SENSATION! ANNOUNCED New PC Provides Platform for Next Generation of Personal Computing Software

FORT WORTH, Texas -- Celebrating fifteen years of leadership in the digital electronics industry, Tandy Corporation introduced today the Tandy® *Sensation!*™, Tandy's first PC in which fully integrated multimedia is a standard part of every unit. Tandy also introduced Tandy® WinMate™ software, a Windows™ organizer developed exclusively for the *Sensation!* Multimedia Personal Computer (MPC).

WinMate makes it easier to exercise the power of Windows while utilizing features unique to *Sensation!* -- including Tandy's exclusive Multimedia Palette Chip with 16 million color display, and modem with voice mail capabilities. Tandy's *Sensation!* is also a high performance IBM compatible PC.

The *Sensation!* sets a new standard for personal computers in the 90's. It is what a PC should be to support the next generation of computing software. "With a full range of multimedia features, an impressive array of software applications, voice mail, text to speech technology, true digital stereo, fax capability, and optional full-function TV display -- it truly represents a new dimension in personal computing," said Bernard S. Appel, senior vice president of Tandy Corporation. *Sensation!* even looks different. Special design features and front mounted controls give it an entirely new look. "The *Sensation!* begins -- where ordinary PCs stop," added Appel.

Tandy's new *Sensation!* is a 486-based Multimedia Personal Computer perfectly suited for home, education, home-office, or small business users. A world of information, delivered in

exciting, multi-sensory human terms, awaits the user with *Sensation!*. Personal and professional productivity tools as well as a wide selection of education, communication, and entertainment applications are ready to run at the click of a mouse.

Sensation! ships with MS-DOS® 5.0, Windows™ 3.1 (Multimedia Version), Microsoft® Works for Windows™ (Multimedia Version), and Microsoft® Bookshelf® for Windows™. It also includes America Online, PRODIGY, and The Sierra Network communications software.

Tandy's new WinMate organizer for Windows represents a totally unique experience in multimedia computing. WinMate software and the Tandy *Sensation!* MPC were, literally, made for each other. The "WinMate Difference" gives *Sensation!* a distinct competitive edge over other multimedia PCs.

When powered up, *Sensation's* screen opens to WinMate's eight function categories: In Touch, In the Know, In the Bank, In Control, In Charge, In Play, In Print, and Inside. Users have the option of selecting a category directly or calling for a digitized voice description of its content.

In Touch features Telemind, an advanced telephone answering system with state-of-the-art voice mail capabilities that may be accessed from a remote location; and Message Center, a message center that accepts and plays back individual messages in text or voice format. With Telemind, users may call Message Center and have a text message "read" to them over the telephone or access their daily calendar schedule.

WinMate software lets users select from seven multimedia reference works on Microsoft's electronic Bookshelf; access a wide range of financial planning, personal, and home management applications; print banners, greeting cards, signs, and name tags; or play a variety of interactive multimedia games for fun and education.

America Online, PRODIGY, and The Sierra Network connect the user to a world of entertainment, business, and educational information including financial, news, weather, sports, shopping services, and electronic mail.

Sensation! includes hundreds of clipart images, digitized photographs (in 16 million colors), additional fonts, a complete AT&T 800 number directory, sound effects and tunes in 5/15/30/60 second clips. *Sensation!* can also record and play back verbal messages or, utilizing text to speech technology, play back typed information as a computer generated voice.

The Tandy *Sensation!* is a 25 megahertz(MHz) i80486 SX MPC with 4 megabytes(MB) of standard memory (expandable to 32MB), a 3.5-inch 1.44MB floppy drive, 107MB IDE SmartDrive™ hard disk, and CD-ROM drive with a fast 375ms average access time. It has Tandy's new Multimedia Palette chip (16 million color display and faster animation), SVGA graphics with 512K VRAM (optional VRAM upgrade to 1MB) and a Windows accelerator (up to 70% faster than normal VGA). *Sensation!* also features Tandy enhanced MPC sound on the main logic board with a 12-bit analog-to-digital and digital-to-analog converter and FM synthesizer, a 2400 bps modem with digital tones multiple frequencies (DTMF) decode and voice mail capabilities, and 4800 baud fax transmission.

Other standard features include three 16-bit industry standard (ISA) expansion slots; serial, parallel, MIDI, mouse, and dual joystick ports; and stereo line out jacks. Volume control, speaker, microphone, and headphone jacks are front mounted. *Sensation!* also ships with a deluxe 101-key enhanced keyboard and a two-button PS/2 style mouse. The suggested retail price is just \$1,999.

With the optional PC/TV add-in board (suggested retail \$399.95), the *Sensation!* doubles as a full-function high-resolution TV set. The PC/TV board has a 122-channel cable-ready on-board tuner; two million color display; and software control for fine-tuning, audio, color and hue, contrast, and brightness.

--more--

The *Sensation!* also features an optional combination amplifier and speaker system (suggested retail \$99.95) with rich digital stereo sound. This attractive, matching system fits neatly between the monitor and computer.

Sensation! is manufactured at Tandy's advanced computer manufacturing facility in Fort Worth, Texas and will be available in October at nearly 7,000 participating Radio Shack® stores and dealers.

On August 3, 1977, Radio Shack introduced the Radio Shack TRS-80®, the first ready-to-run, fully-assembled personal computer system. Radio Shack quickly took the lead in the budding personal computer industry by becoming the first to distribute PCs nationwide through more than 3,000 stores. Tandy continued to maintain a leadership role when it became the first to include digital sound and graphics and recording capability in the Tandy® 1000 series. Later, Tandy and Microsoft co-developed the minimum specification for multimedia personal computers. Last year, Radio Shack introduced the first full line of affordable MPCs based on the new specification.

Now, Tandy's new *Sensation!* is leading the way in personal computing for the 1990s.
