NEWEST CONSUMER ELECTRONICS MADE IN AMERICA FIRST VIS, DCC AND SENSATION! ROLLING OFF FORT WORTH ASSEMBLY LINES

FORT WORTH, Texas — For the first time in over a decade, US consumers will find the latest technological advancements in consumer electronics bearing a "*Made in the USA*" label first.

The Memorex™ MD-2500 Video Information System (VIS)™, the Optimus® DCT-2000 Digital Compact Cassette (DCC) Recorder and the Tandy® Sensation!™, now shipping to nearly 7000 Radio Shack® stores nationwide, are being manufactured in Tandy Corporation's Advanced Technology manufacturing facility in Fort Worth, Texas.

"In recent years, consumers have become accustomed to the newest electronic products coming first from foreign manufacturers. Radio Shack is going against that trend by introducing three new exciting consumer electronics technologies, all made in our own plant here in the United States," said Bernard S. Appel, Radio Shack Chairman.

The Memorex MD-2500 Video Information System, conceived and designed by Tandy Corporation, attaches easily to any home television set and provides instant access to reference books, instructional materials, learning and action games and a wealth of educational programs. With the included wireless hand controller, family members can interact with the pictures, voice, music and animation sequences contained in VIS applications. The VIS is tailored to meet the home education, learning, information and entertainment needs of the 1990's family.

The Video Information System has already been named one of the "*Best of What's New*" products and technologies for 1992 by *Popular Science Magazine*.

It comes with a VIS version of the entire 26-volume Compton's Multimedia Encyclopedia™ which includes Webster's Intermediate Dictionary, all on one VIS disc. Nearly fifty software publishing companies are committed to delivering over 100 VIS titles before the end of the year. The Memorex MD-2500 VIS (Catalog no. 16-376) retails for \$699.95.

The Optimus DCT-2000 Digital Cassette Recorder offers the best of both worlds to discriminating audio enthusiasts. DCC users can record and play back true digital audio recordings on DCC tapes -- and play their existing library of analog cassettes. The DCT-2000 makes perfect copies from compact discs, indistinguishable from originals, as well as superb recordings from analog sources such as LPs and analog tapes.

The DCT-2000 incorporates the best in audio technology including a 64-times oversampling rate; fiber-optic, coaxial and analog inputs to permit recording from any available source; and a unique display that shows titles and performers' names on prerecorded DCC tapes.

Stereo Review has called the Optimus DCT-2000 "[a] very mature first-generation product. The Tandy engineers did their homework and have brought forth a very competitive recorder." The Optimus DCT-2000 (Cat. no. 14-675) retails for \$699.95, and is available nationwide.

The Tandy *Sensation!* is the first PC to include multimedia as an integral part of the computer. It is the most complete, feature-packed multimedia PC ever introduced. It provides easy access to thousands of megabytes of information stored on CD-ROM compact discs -- information that can be displayed with outstanding graphics, animation and in stereo sound. Tandy's built-in palette chip gives photo images stunning clarity in up to 16-million colors.

Tandy's new WinMate™ software organizer, designed exclusively for *Sensation!*, makes it easy to harness the power of the Windows™ 3.1 operating system. *Sensation!* includes a sophisticated voice mail system, with text-to-speech conversion; built-in modem with fax capability; and a full range of exciting, interactive multimedia applications.

Sensation! also comes with a complete library of software including Microsoft® Works for Windows™, and Microsoft® Bookshelf for Windows, as well as America Online, **PRODIGY**, and the Sierra Network communications software.

The *Sensation's* 486SX microprocessor enables it to run standard PC software faster and more efficiently than most "traditional" computers. Suggested retail price for the Tandy *Sensation!* (Cat no. 25-1650) is \$1999.

"By developing and producing new and exciting products like *VIS*, DCC and *Sensation!* in the US.," said Appel, "Radio Shack is doing its part to make the "*Made in the USA*" label more visible than it has been in a long time. We hope more companies will follow our lead."

Prices are good at all Radio Shack and participating dealer stores nationwide. Check with the nearest Radio Shack store or dealer for local availability.
